DATA ANALYST | BUSINESS ANALYST | REPORTING ANALYST | BUSINESS INTELLIGENCE ANALYST

PROFESSIONAL SUMMARY

- Data and Business Analytics professional with **2+ years of combined experience** across data analysis, business reporting, dashboard development, requirements analysis, data validation, and operational decision support, including Canadian analytics experience.
 - Apply **SQL, Power BI, Python, Excel, pandas, AWS Athena, and AWS Data Wrangler** to extract, clean, transform, validate, analyze, and visualize data for KPI reporting, trend analysis, and business decision-making.
 - Support stakeholders through **requirements gathering, reporting analysis, dashboard development, data reconciliation, process analysis, and business insights**, with experience analyzing datasets containing **100,000+ records**.
-

TECHNICAL SKILLS

- **Data Analysis & Reporting:** SQL, Python, Microsoft Excel, pandas, exploratory data analysis (EDA), statistical analysis, data cleaning, data validation, trend analysis, KPI reporting, ad hoc reporting
 - **Business Intelligence:** Power BI, dashboard development, data visualization, business performance reporting, analytical reporting, decision support
 - **Business Analysis:** Requirements gathering, requirements analysis, stakeholder communication, process analysis, business workflows, reporting requirements, business rules, documentation
 - **Data & Databases:** MySQL, PostgreSQL, SQLite3, AWS Athena, AWS Data Wrangler, relational databases, ETL, data extraction, data transformation
 - **Tools & Delivery:** Jira, Basecamp, Agile/Scrum, Git, GitHub, Odoo ERP
-

PROFESSIONAL EXPERIENCE

Reporting Analyst

Self-Employed, Toronto, ON | Remote | May 2026 – Present

- Analyze and reconcile **20,000–30,000 records per reporting cycle** using SQL, Excel, Python, and Power BI to identify trends, exceptions, and reporting discrepancies.
- Develop and maintain **3–5 Power BI dashboards and recurring reports tracking 10–15 KPIs** for operational review and business decision-making.
- Automate recurring data-preparation and reporting activities, reducing **manual reporting effort by 10–15%** while improving consistency across reporting cycles.
- Gather reporting requirements from **3–5 stakeholders** and translate business needs into dashboard specifications, KPI definitions, report layouts, and analytical requirements.
- Investigate and resolve **5–10 data or reporting discrepancies per month**, documenting data sources, business rules, validation findings, and report definitions.

Data Analyst Co-op, Project Lead

Halight Inc., Windsor, ON | Jan 2026 – Apr 2026

Technologies: Power BI, Python, AWS Athena, AWS Data Wrangler, Jira, Basecamp

- Led a data analytics capstone team in developing **Power BI performance dashboards** supporting stakeholder access to organizational metrics and reporting information.
- Gathered and coordinated **business requirements, reporting needs, project tasks, and deliverables** with team members and stakeholders.
- Built automated data workflows using **Python and AWS Data Wrangler** to extract, transform, and process organizational data from Amazon Athena for analysis and reporting.
- Analyzed datasets containing **100,000+ records**, performing data cleaning, validation, exploratory analysis, and preparation for reporting and analytical workflows.

- Managed project workflows through **Jira and Basecamp**, maintaining documentation, tracking deliverables, and coordinating stakeholder communication.

Data Analyst

Orange Technolab Private Limited, Gujarat, India | Hybrid | Aug 2022 – Jul 2024

Technologies: Python, SQL, Excel, pandas, Odoo ERP, Selenium, Playwright, BeautifulSoup

- Analyzed business and operational data using **Python, SQL, Excel, and pandas** to support reporting, trend analysis, and business decision-making.
- Extracted, cleaned, transformed, and validated data from multiple sources to improve data quality and prepare structured datasets for analysis and reporting.
- Analyzed **business requirements, operational workflows, and reporting needs** within Odoo ERP to identify data and process improvement opportunities.
- Developed automated data-extraction workflows using **Python, BeautifulSoup, Playwright, and Selenium** to collect and structure business information for analytical use.
- Prepared analytical outputs highlighting **trends, patterns, exceptions, and performance insights** to support operational and stakeholder decisions.

ADDITIONAL EXPERIENCE

IT Technician, Part-Time

St Clair College, Windsor, ON | Aug 2025 – Apr 2026

- Provided front-line technical support at the TD Student Success Centre, resolving **80%+ of immediate student IT inquiries** involving portal access, authentication, printing, hardware, and workstations.
- Documented and escalated complex technical issues and coordinated with the central IT department to support timely resolution and clear communication.

ACADEMIC PROJECT

Healthcare 30-Day Readmission Risk Analysis

- Analyzed the **Diabetes 130-US Hospitals dataset**, performing data cleaning, validation, exploratory analysis, hypothesis testing, and feature analysis to identify factors associated with 30-day readmission.
- Identified prior inpatient utilization as a key predictive signal and interpreted analytical findings within the context of patient readmission risk.
- Trained and evaluated **XGBoost and LightGBM models**, achieving **0.5466 Recall and 0.6804 ROC-AUC** while accounting for an **11.2% positive class**.

EDUCATION

Bachelor of Engineering in Electronics and Communication Engineering

L.J. Institute of Engineering and Technology, Gujarat, India | Jul 2019 – Jul 2023

Graduate Certificate in Data Analytics for Business

St. Clair College, Windsor, ON | Sep 2024 – Apr 2026

GPA: 3.76/4.00 | Academic Honours
